

PAVERDECK PLANK

Porcelain Tiles and Pavers on Your Deck

PAVERDECK
PLANK

Paverdeck Plank is built for a life without maintenance and includes unlimited design options and unmatched performance.

SIMPLE INSTALLATION

Protect Joists With Joist Tape

Screw Paverdeck Plank Into Joists

Install Tiles or Pavers

UNMATCHED PERFORMANCE

- ◆ Installs over an existing or new wood joist structure.
- ◆ Forms a complete diaphragm over the wood structure - extends your deck lifespan beyond 20 years.
- ◆ Supports standard outdoor porcelain tile, stone/ concrete pavers, or other surface finishes. Tile is installed with beads of glue - not full adhesion.
- ◆ With tile, your deck weighs similar to a standard wood deck, allowing you to utilize existing beams and footings.

Affordable. Comparable to the cost of a composite deck. You can use surface options to fit any budget, and the lifespan of Paverdeck Plank adds value to your home.

Freedom from Maintenance. Stone or porcelain pavers are virtually maintenance free.

Resistant to Fire and Insects. Paverdeck Plank is not susceptible to fire or rot - it will not allow the fire to burn or weaken the structure.

Renovation Ready. Simply remove existing wood decking to be replaced with Paverdeck Plank.

Rooftop Terraces / Balconies. The Paverdeck Plank structure is ideal for rooftop terraces or condominium balconies. The combination of a long lifespan and light weight provides advantages over existing systems.

Unlimited Design Options. Design your space the way you want - a Paverdeck Plank structure can be cut and shaped into any design, and tile can be installed in any pattern.

Strong. With automotive unibody engineering, the patented structure is made from high strength galvanized steel; commercial and residential applications.

A Paverdeck Plank deck can be installed on deck pads or with frost footings. Unlike a traditional patio or deck, the steel diaphragm resists heaving and movement.

Tiles and pavers are an excellent outdoor flooring choice with a number of important advantages:

- ◆ Available selection at any budget.
- ◆ Durability.
- ◆ Resistance to liquids.
- ◆ Stain-resistance.

Unlimited design options.
Design your space the
way you want.

Joints can be filled less expensively using Gator Tile sand, which is a unique mixture of polymer binders and calibrated sand available in a range of colors. Once Gator Tile sand sets, it becomes very firm and locks between the tile joints while still retaining flexibility and providing a long lasting, durable jointing material.

Environmentally Friendly
